ARAVA SYAM SAI KUMAR

Full Stack Developer

9912073594 syamarava30@gmail.com linkedin.com/in/syam-sai-arava github.com/Syamsai45 Hyderabad, India

PROFESSIONAL SUMMARY

Full-stack developer with **1+ year of professional experience** designing and shipping scalable web applications, admin dashboards, and REST APIs. Proficient in React.js, Node.js, Express.js, and MongoDB with hands-on expertise in JWT authentication, cloud media management, and real-time UI. Committed to clean architecture and measurable performance improvements.

WORK EXPERIENCE

Software Engineer — Full Stack Developer

Feb 2025 – Present

Pixel Mind Solutions Pvt Ltd · Hyderabad

- Led end-to-end development of **multiple full-stack web applications** across client projects, owning the architecture, implementation, and delivery using **React.js, Node.js, Express.js**, and **MongoDB** — from initial design through production deployment
- Designed and implemented **secure authentication systems** across projects, including **JWT-based session management**, OTP verification via **Twilio** and **Nodemailer**, and **Firebase** integration — with role-based access control tailored to each application's user structure
- Built scalable **RESTful APIs** and backend services in **Express.js**, handling business logic, middleware, data validation, and error handling — integrated across multiple frontend applications using **Axios** with consistent response structures
- Developed reusable **React.js component libraries** including dynamic search, filters, data tables, modals, and form flows — used across projects to maintain UI consistency and accelerate frontend delivery
- Architected **MongoDB** data models using **Mongoose** for varied domains including inventory, bookings, and user management — applying schema design best practices, indexing strategies, and relationship modeling based on project requirements
- Handled **file upload and media management** using **Multer** and **Cloudinary** across admin panels and customer-facing modules, managing image storage, retrieval, and optimization as part of larger application workflows
- Maintained high code quality through **API testing with Postman**, peer code reviews, and debugging with **Chrome DevTools**; coordinated tasks and delivery timelines across projects using **Jira** and **Slack** in an **Agile** environment

PROJECTS

Vegiffy — Delivery Platform [github]

Developed the **backend for a full-scale grocery delivery application** with separate modules for customers, vendors, and riders. Built **RESTful APIs** covering product listings, order management, real-time status tracking, and multi-role **JWT authentication**. Implemented **Multer** for product image uploads and structured **MongoDB schemas** to handle complex delivery workflows across user types.

Car Rental — Vehicle Booking System [github]

Built the **backend system for a vehicle rental platform** featuring car listings, availability management, booking flows, and user authentication. Designed **Mongoose schemas** for vehicles, reservations, and users with **role-based access control** separating admin and customer permissions. Exposed clean **REST API endpoints** consumed by the frontend booking interface.

Credenthealth — Healthcare Web Platform [github]

Contributed to a **healthcare web application** built for credential management and professional verification. Developed **React.js UI components** and integrated **REST APIs** for profile management, document handling, and secure login flows. Focused on responsive design, form validation, and smooth data flow between frontend and backend services.

Smartlabtech — Electrical Company Platform github
End-to-end business platform for an electrical company featuring a public-facing website, admin dashboard, inventory management system, and service booking portal. Reduced manual booking coordination by **~50%** and centralized **100+ product listings** through a single admin interface. Deployed live on Render with secure auth and role-based access control.

TECHNICAL SKILLS

Frontend	React.js, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, REST APIs, JWT Auth, Multer, Nodemailer, Socket.io
Databases	MongoDB, Mongoose, MySQL, SQL Server
Cloud & Services	Cloudinary, Firebase, Twilio, Render, Axios
Tools	Git, GitHub, Postman, VS Code, Jira, Chrome DevTools

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering *2020 – 2024*
Chalapathi Institute of Engineering & Technology, Guntur, Andhra Pradesh
Acharya Nagarjuna University (ANU) · Affiliated

CERTIFICATIONS

Node.js — Backend Web Development [Internship] 2025
Backend Development · REST API · Express.js · Node.js · MongoDB

Full-Stack Web Development 2025
HTML · CSS · JavaScript · React.js · Node.js · Express.js · MongoDB

SQL Certification [Link] 2024
